

Hi-Temp Cartridge Heaters

With Replaceable Thermocouple

Not Just for Runnerless Anymore...

For many years the replaceable MgO insulated thermocouple has been a feature of bushings, torpedoes, Sensitwin® and integrally heated nozzles. These are all components unique to our runnerless systems.

Available in 3 Sizes

This proven feature is now available on $\frac{3}{8}$ ", $\frac{1}{2}$ ", and $\frac{5}{8}$ " diameter Hi-Temp Cartridge Heaters. Contact SFP for other dimensions, including metric.

A miniature stainless steel tube thermowell is swagged into the heater assembly; a .020" diameter stainless steel sheathed MgO insulated "J" type thermocouple is inserted into the thermowell.

Less Downtime

Thermocouple failures can be attributed to contamination, oxidation or abuse, at which time the conventional cartridge heater with a permanently positioned thermocouple must be removed from its application. This maintenance downtime can result in a costly loss of production.

No Need to Remove Cartridge

The replaceable thermocouple feature not only eliminates the necessity of removing the cartridge heater, but the cost of the heater/thermocouple combination is also not required. Reduced maintenance labor for the thermocouple replacement vs. that of the heater/thermocouple should be experienced.

Position TC Anywhere

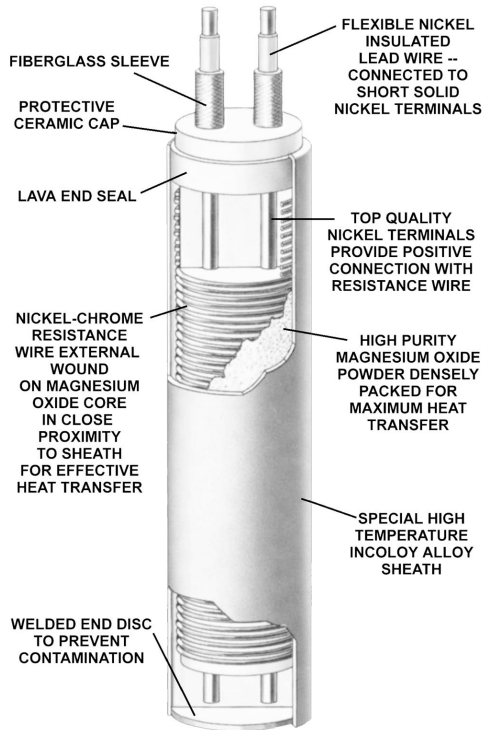

The replaceable thermocouple also has a unique feature of being able to be positioned to any depth of penetration along the thermowell length. In this manner, internal temperatures at any position can be monitored for heat distribution.

CALL FOR PRICING

800-627-1033

Hi-Temperature Quality Cartridge Heaters for Excellent Heat Transfer Efficiency

FEATURES:

- Longer Heater Life
- Internal Temperatures to 1600°F
- Optimum Performance
- Standard Sizes and Ratings
- Special Hi-Temp Alloy Sheath Material
- Choice of Voltage 120V or 240V (Other Voltages on Request)

Many sizes and constructions in stock!

TYPE & LEAD LENGTH SPECIFICATIONS

(See following page for descriptions of each termination type available.)

Type AH cartridges are available with the following terminations:

AA, GS, FC, 9S, FR, and SC.

Type AF cartridges are available with the following terminations:

AA, GS, FC, SP, BD, 9S, FR, GG, AL, and SC.

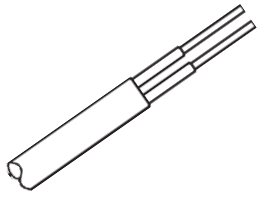

Type AG cartridges are available with the following terminations:

AA, GS, FC, SP, BD, GG, AL, 9S, FR, 9R, RA, 9A, SB, LB, BB, and SC.

Type GG cartridges are only available with 10" flexible leads.

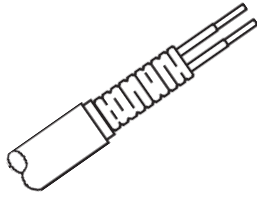

Cartridge Heaters Terminations

Termination AA

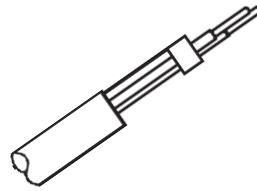

Rigid Post Externally Connected Leads

Termination GS

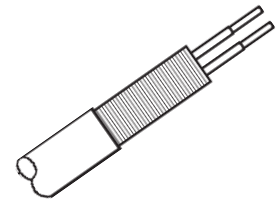

Straight Leads with Silk and Paint

Termination FC

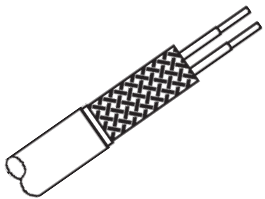

Straight Leads with Clip Support

Termination SP

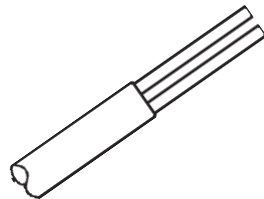

Straight Strain Relief Spring

Termination BD

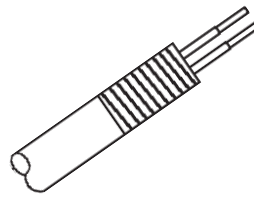

Stainless Steel Braid Over Pair of Leads

Termination GG

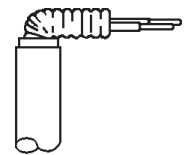

All Flexible Leads

Termination AL

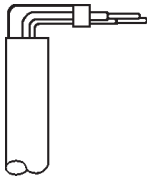

Straight Stainless Steel Armor

Termination 9S

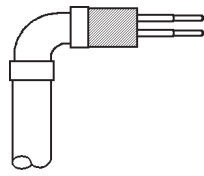

Right Angle Leads with Silk and Paint

Termination FR

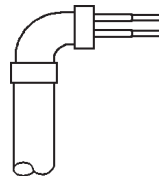

Right Angle Leads 90° Clip Support

Termination 9R

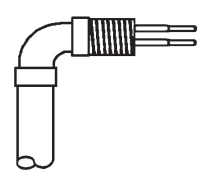

Right Angle Copper Elbow with Spring

Termination RA

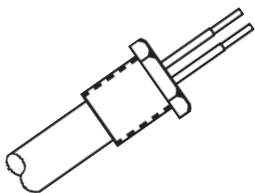

Right Angle Copper Elbow Plain Leads

Termination 9A

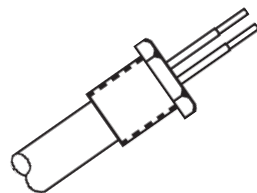

Right Angle Copper Elbow with Armor Cable

Termination SB

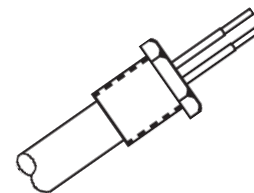

Hex Head NPT Bushing Straight Stainless Steel

Termination LB

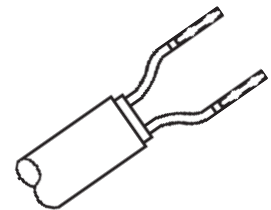

Hex Head NPT Bushing Cold Rolled

Termination BB

Hex Head NPT Bushing Brass

Termination SC

Screw Termination
